

# Introduction to Technical Computer Science

## Registration

You need to register for this lecture. Please register in [CampusOffice](#) until 2006-11-13.

## Content

The introduction to technical computer science is one of the mandatory lectures within the bachelor computer science studies. The goal here is to give the students an overview of elementary functionalities of modern computational devices and to mediate a computer's composition in principle from a hardware point of view. For this, we will present the basic modules and the most fundamental architectural principles of computers.

Specifically, we will discuss the following topics:

- Boolean functions
- Combinatorial circuits
- Control units
- Computer arithmetics
- Computer architecture
- Micro programming
- Micro processors
- Assembler programming

## Literature

- Rechneraufbau und Rechnerstrukturen by Walter Oberschelp, Gottfried Vossen
- Becker, Dechsler, Molitor: Technische Informatik. Pearson 2005

## Schedule

- Regular Lecture Dates
  - From 2006-10-19 on, every thursday from 10:00am -11:30am in the Audimax (AM) lecture hall.
  - There will be an additional lecture session on Friday 2006-10-20 from 2:30pm - 4:00pm in AM.
  - There will be no lecture on 2006-12-07. An exercise exam will take place instead (AM 10:00am -11:30am).
- Regular Exercise Sessions
  - From 2006-10-20 on, every Friday from 2:30pm - 4:00pm in the Audimax (AM) lecture hall.

- One-time Exercise Examination
  - On Thursday 2006-12-07 there will be an exercise exam in Audimax (AM) from 10:00am -11:30am.
