About

I am part of the [Cyber-Physical Mobility Group](#). I research service-oriented software architectures for control systems as part of the SOMC project. Its goal is the create a framework for control systems that allows dynamically adaptable systems.

Theses

If you are interested in a bachelor or master thesis, please contact me via email. Your own suggestions for topics are also possible.

HiWi/WiHi Jobs

Current job offers can be found [here](#). Unsolicited applications are also welcome. Your application should include an overview of your grades and a short curriculum vitae.

Current Positions in my Project

- Service-Oriented Model-based Control
