

Spring Colloquium 2022

Between 13.06. and 15.06.2022, our scientific staff presented and discussed current research results during our spring colloquium in beautiful Möderscheid in Belgium. In addition, we discussed strategies for a modern external presentation of the Chair and spent a creative break while hiking in the High Fens. Once again, it became clear how important and indispensable the meetings and exchanges on site are for a motivating social life at the chair.
